

FY 2017 ANNUAL LISTING OF FEDERALLY OBLIGATED PROJECTS

Jackson Metropolitan Planning
Organization (MPO)

INTRODUCTION

The annual listing of obligated projects is a record for tracking the progress of projects receiving federal transportation funds. This listing is updated annually and is intended to increase public awareness of federal spending on transportation projects in the Jackson Metropolitan Planning Organization's (MPO's) planning area. The Fixing America's Surface Transportation Act (FAST Act), signed into law on December 4th, 2015, requires that:

"An annual listing of projects, including investments in pedestrian walkways and bicycle transportation facilities, for which Federal funds have been obligated in the preceding year shall be published or otherwise made available by the cooperative effort of the State, transit operator, and metropolitan planning organization for public review." 23 CFR 134(j)(7)(B)

This report addresses these requirements by providing a listing of all transportation projects in the Jackson MPO's planning area in which Federal funds were obligated during Fiscal Year 2017 (October 1, 2016 - September 30, 2017). The Federal Highway Administration (FHWA) defines "obligated" as ***"the federal government's legal commitment (promise) to pay or reimburse the States or other entities for the Federal share of a project's eligible costs"***. An "obligated" project is one that has been authorized by the federal government and funds have been obligated or approved for reimbursement.

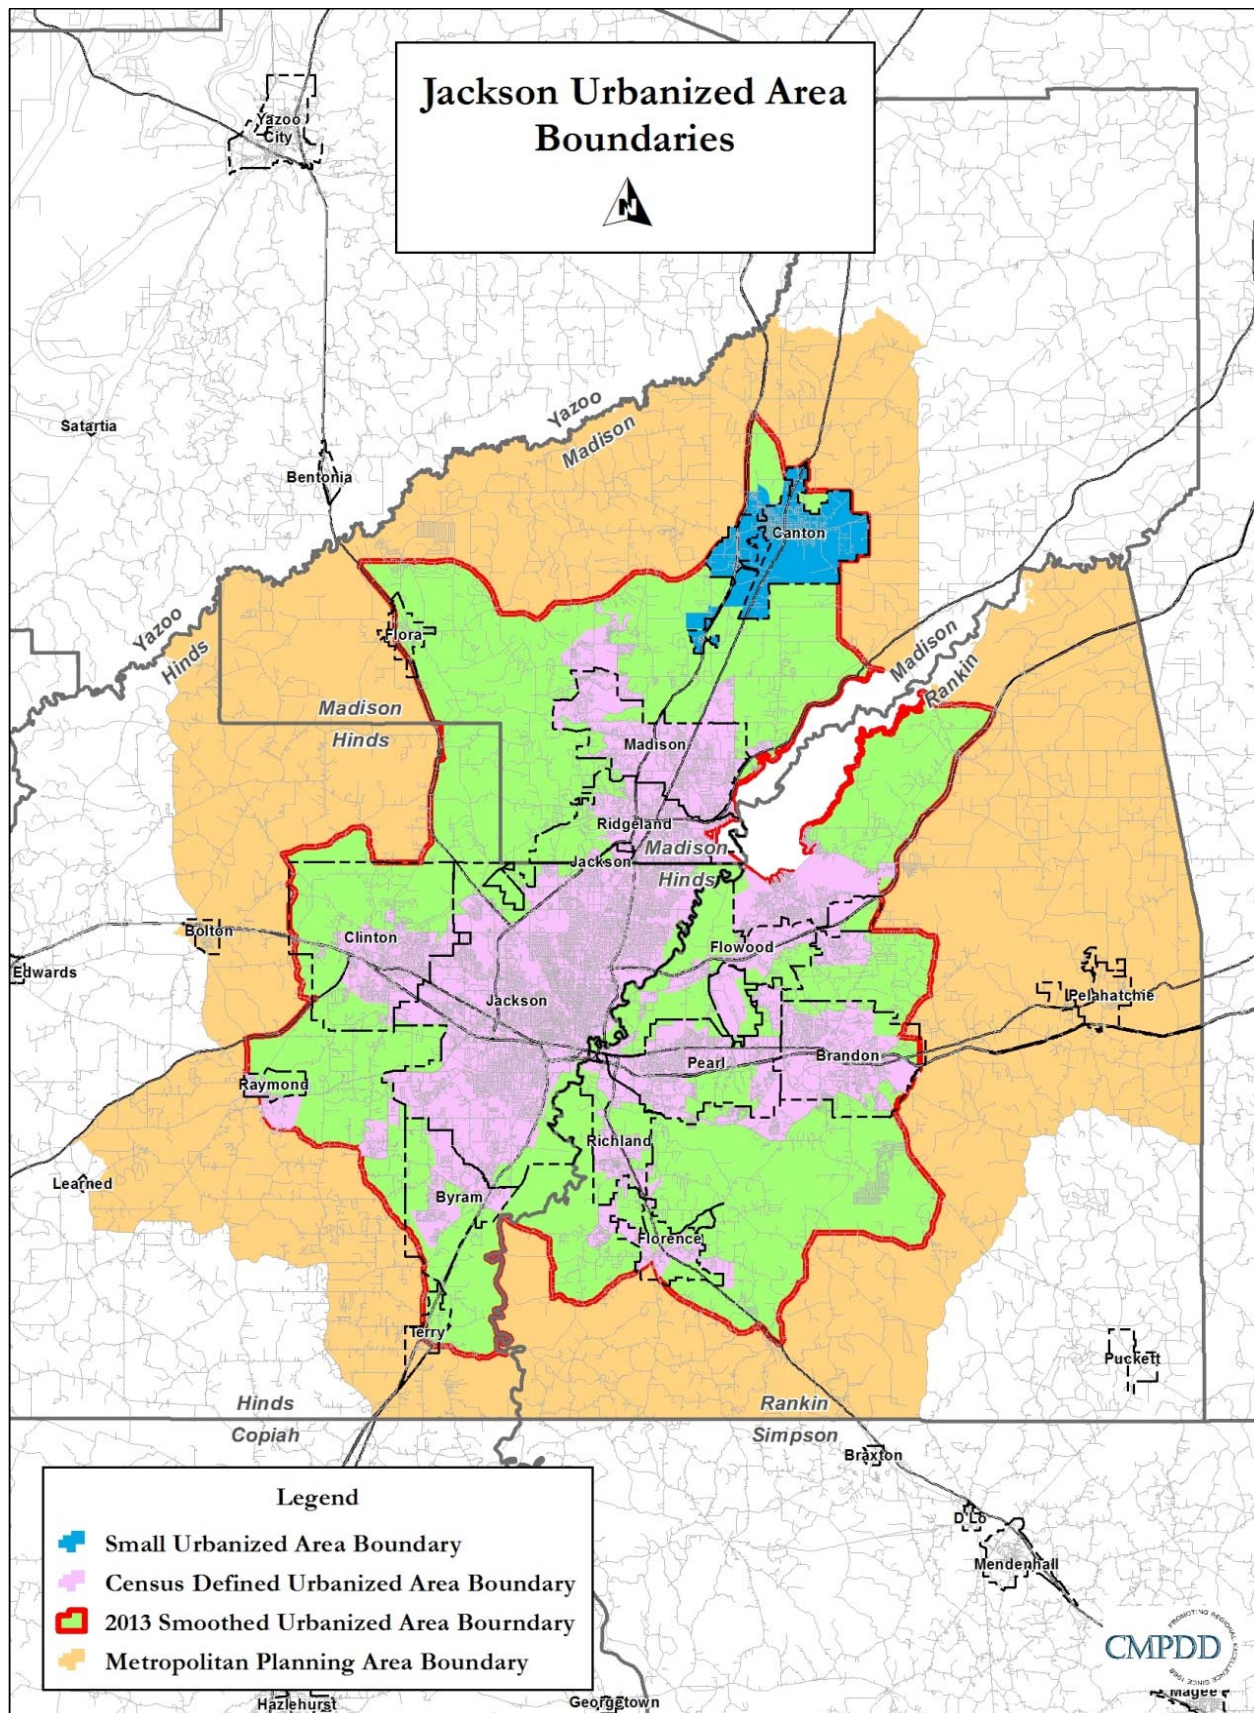

THE JACKSON MPO

The Metropolitan Planning Organization (MPO) is a federally mandated planning body responsible for transportation planning in the Jackson Urbanized Area (JUA). Federal regulations require all urbanized areas with a population of at least 50,000 to designate an MPO to carry out the transportation planning process. The Central Mississippi Planning and Development District (CMPDD) was designated as the MPO for the JUA on February 5, 1975 and is responsible for coordinating the transportation planning process and programs for all county and municipal jurisdictions within the urbanized areas of Hinds, Madison and Rankin Counties. The MPO is the lead agency responsible for developing and administering plans and programs to maintain eligibility and receive federal funds for the transportation systems in the JUA. The primary mission of the MPO is to develop and maintain a transportation planning process that is compliant with federal and state requirements, and supports the development and enhancement of sustainable multimodal facilities, programs and systems in the area.

The Jackson MPO functions under a committee structure comprised of the Metropolitan Planning Policy Committee and the Intermodal Technical Committee. The Metropolitan Planning Policy Committee consists of elected and appointed officials representing the county and municipal jurisdictions located in the Jackson MPO planning area boundary, a public transit services representative and the Director of the Mississippi Department of Transportation (MDOT). This committee also includes the Division Administrator for the Federal Highway Administration (FHWA) in Jackson and the Regional Administrator of the

Federal Transit Administration (FTA), each serve as non-voting members. This committee is responsible for making policy decisions regarding the transportation planning process in the JUA.

The Intermodal Technical Committee is comprised of representatives whose skills and training are more technical in nature and necessary to undertake comprehensive transportation planning activities for the JUA. Representatives from each of the county and municipal jurisdictions located in the Jackson MPO planning area are included on this committee, as well as representatives of all transportation modes in the area, including streets/highways, public transportation, bicycling/walking, air transportation, rail, and the trucking industry. The Technical Committee is responsible for reviewing and making recommendations to the Metropolitan Planning Policy Committee regarding several major products of the transportation planning process, these include the Prospectus, the Unified Planning Work Program (UPWP), the Metropolitan Transportation Plan (MTP), the Transportation Improvement Program (TIP), the Public Participation Plan (PPP), the Metropolitan Planning Area Boundary and the Surface Transportation Block Grant (STBG) and Transportation Alternatives (TA) Project Submittal Guidelines and Application processes. In addition, the Technical Committee acts upon any other matters relating to the transportation planning process that the Committee deems necessary and hears comments from citizens and others at public hearings and forwards their recommendations to the Metropolitan Planning Policy Committee for approval. The map on the following page identifies the Jackson MPO's census defined, smoothed urbanized, and planning area boundaries. In addition, the map identifies any small urbanized areas in the MPO's planning area.

THE METROPOLITAN TRANSPORTATION PLAN (MTP)

The Metropolitan Transportation Plan (MTP) for the Jackson Urbanized Area is a multimodal plan describing the transportation system that will best suit the projected travel needs for the Metropolitan planning area over a 25 year planning horizon. The multimodal aspect of the plan takes into account the projected needs and desires of the various sectors of the public for mobility; whether by car, public transit, truck, rail or bicycle and according to purpose, for work, school, commerce or pleasure.

The MTP is developed through a coordinated process between the MPO, local jurisdictions, various agencies, and the public in order to develop regional solutions to maintain, manage and improve the surface transportation network in the JUA. The MTP is updated every five years to reflect new planning priorities and changing projections of growth and travel demand. The current MTP for the Jackson Urbanized Area, the 2040 Metropolitan Transportation Plan, was adopted by the Metropolitan Planning Policy Committee on November 19, 2015.

THE TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

The Transportation Improvement Program (TIP) is a financially constrained four-year program for addressing short-term transportation priorities that are consistent with the Jackson Urbanized Area's MTP. The TIP allocates the limited transportation resources available among the various capital and operating needs of the area, based on the locally developed priorities identified in the MTP. The TIP provides the opportunity to select projects that will implement the transportation planning goals expressed in the MTP. In order for a project to be eligible to receive Surface Transportation Block Grant (STBG) funds and be included in the TIP, it must be included in the MTP's list of priority projects.

The federal funding used to implement the TIP is administered through the FHWA and the FTA. The amount of federal funding each State receives from the FHWA and FTA is based on the State's total population as a ratio of the nation's total population. Each MPO in the State receives its own apportionment from this allocation based off of a similar ratio that compares the population of the urbanized area in the State to the State's total population. TIP projects are generally funded using an 80% federal/20% local-match ratio. However, there are some exceptions, safety projects and some projects funded through congressional earmarks, may receive 100% federal funding. Additionally, it is at the Metropolitan Planning Policy Committee's discretion to increase the amount of required matching funds for a project. For example, the committee may require a 50/50 federal to local match for funds used to resurface roads in poor condition, but require an 80/20 federal to local match for funds used to reconstruct roads in poor condition. For a project to be considered for inclusion in the TIP, a commitment from the sponsoring agency to provide the required local matching funds is required.

The TIP covers a minimum four-year period of investment and:

- Is an agreed upon list of priority projects for the region
- Is updated every two years
- May be amended quarterly
- Is realistic in terms of available funding
- Is approved by the MPO and the Governor of Mississippi
- Will be financially constrained
- Is incorporated into the Statewide Transportation Improvement Program (STIP)

The projects included in this obligation report are from the 2017-2020 TIP, which was adopted by the Metropolitan Planning Policy Committee on August 10, 2016.

ABOUT THIS REPORT

The information provided in this report is based off of projects located within the Jackson MPO's planning area. Each project included is also in the MDOT's STIP and the MPO's TIP. The STIP and TIP each contain transportation projects covering a minimum four year period that are funded, at least in part, with funds from the FHWA and FTA. A TIP is developed by each MPO (Jackson, Gulf Coast and Hattiesburg) in the state and is a listing of regionally significant projects in each MPO's planning area.

The STIP, much like the TIP, is a minimum four-year financially constrained program used to address short-term transportation priorities that are consistent with the State's Long-Range Transportation Plan (LRTP). The STIP incorporates projects included in each MPO's TIP, along with additional projects developed in areas outside of each MPOs' planning area boundaries. The MDOT uses the STIP for the development of priority projects identified in the LRTP and as a mechanism for tracking the progress of those projects across the State.

Obligation of federal funds means that a project has received a federal commitment for reimbursement, and does not necessarily mean that the project was initiated or completed in that year or indicate the total cost of that project. Fund obligations are a measure of the progress being made with the development of a project. As such, the Annual Listing of Federally Obligated Projects Report is prepared at the end of each federal fiscal year to illustrate the progress made with STIP/TIP federal project funding for that fiscal year. It is possible that obligated funds exceed the amount estimated in the STIP/TIP. It is also possible that unused funds may be credited back when not needed at the completion of a project phase resulting in a negative obligation or de-obligation.

SUMMARY OF OBLIGATED PROJECTS

The types of projects for which federal funds were obligated during FY 2017 included bridge improvement/replacement, new roadways, road widening, pavement resurfacing and reconstruction, intersection improvements, interchange improvements, Intelligent Transportation System (ITS) improvements, transit, bicycle/pedestrian facilities, transportation enhancements and safety related projects.

The table on page 10 lists all of the projects obligated in FY 2017. Each listed project contains a project description, type of funding used for the project, amount of federal funds obligated, for whom the funds were obligated and date of obligation. In addition most projects include an FMS and External number; these numbers are unique to the MDOT and used to improve tracking of projects and project funds. While federal funding is included in this report, no local or state funds are reported. In FY 2017, Federal funding in the Jackson MPO area was distributed through the following categories:

Bridge (BR) - Provides funding for bridge replacement or rehabilitation of substandard bridges for any bridge on a public road. In some instances 100% of federal dollars are eligible when Bridge Credits are available. Bridge Credits are generated as a result of the State spending its own dollars to rehabilitate bridges located on the Federal Highway System. Bridge Credits may be used as a substitute for the 20% match required by States in obligating the annual appropriation of Bridge Replacement Funds.

Congestion Mitigation and Air Quality Improvement Program (CMAQ) - The CMAQ program provides a flexible funding source for transportation projects and programs to help meet the requirements of the Clean Air Act. Funding is available to reduce congestion and improve air quality for areas that do not meet the National Ambient Air Quality Standards for ozone, carbon monoxide, or particulate matter (nonattainment areas) and for former nonattainment areas that are now in compliance (maintenance areas).

Congressional Earmarks (Earmark) – Funds appropriated by Congress for specific projects including any anticipated grants awarded to MDOT, Office of State Aid Road Construction, or local entities.

Delta Region Transportation Development Program (DRTD) – The DRTD program provides grants to: (1) support and encourage multistate transportation planning and corridor development; (2) provide for transportation project development; (3) facilitate transportation decision making; and (4) support transportation construction in the Delta region. The Delta region includes portions of Alabama, Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee under the authority of the Delta Regional Authority.

Emergency Relief (ER) - Congress authorized in Title 23, United States Code, Section 125, a special program from the Highway Trust Fund for the repair or reconstruction of Federal-aid highways and roads on Federal lands which have suffered serious damage as a result of (1) natural disasters or (2) catastrophic failures from an external cause. This program, commonly referred to as the emergency relief or ER program, supplements the commitment of resources by States, their political subdivisions, or other Federal agencies to help pay for unusually heavy expenses resulting from extraordinary conditions.

Equity Bonus – The Equity Bonus program replaces TEA-21's Minimum Guarantee program. The Equity Bonus ensures that each State receives a specific share of the aggregate funding for major highway programs (Interstate Maintenance, National

Highway System, Bridge, Surface Transportation Program, Highway Safety Improvement Program, Congestion Mitigation and Air Quality Improvement, Metropolitan Planning, Appalachian Development Highway System, Recreational Trails, Safe Routes to School, Rail-Highway Grade Crossing, Coordinated Border Infrastructure programs, and Equity Bonus itself, along with High Priority Projects), with every State guaranteed at least a specified percentage of that State's share of contributions to the Highway Account of the Highway Trust Fund.

FTA Urbanized Area Formula Program (Section 5307) - Provides funds for capital and operating assistance for transit operations in urbanized areas with populations greater than 50,000 and for transportation related planning. Funds can be for planning, engineering, design and evaluation of transit projects and other technical transportation-related studies; capital investments in bus and bus-related activities such as replacement of buses, overhaul of buses, rebuilding of buses, crime prevention and security equipment and construction of maintenance and passenger facilities; and computer hardware/software.

FTA Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310) – This program supports transportation services planned, designed, and carried out to meet the special transportation needs of seniors and individuals with disabilities in all areas – large urbanized (over 200,000), small urbanized (50,000-200,000), and rural (under 50,000). Eligible projects include both traditional capital investment and nontraditional investment beyond the Americans with Disabilities Act (ADA) complementary paratransit services. Examples of eligible activities for FTA 5310 funding include, but are not limited to: buses and vans, wheelchair lifts, ramps, securement devices, transit-related information technology systems including scheduling/routing/one-call systems; mobility management programs, volunteer driver programs, building an accessible path to a bus stop including curb-cuts, sidewalks, accessible pedestrian signals or other accessible features.

FTA Rural Area Program (Section 5311) - This program provides funding to states and federally recognized Indian tribes to support public transportation in rural areas with populations less than 50,000. Funding can be used for planning, capital, operations, job access and reverse commute projects, and the acquisition of public transportation services.

FTA Bus and Bus Facilities Formula Program (Section 5339) – Provides capital funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities including technological changes or innovations to modify low or no emission vehicles or facilities.

Highway Safety Improvement Program (HSIP) - HSIP funds may be used to carry out highway safety improvement projects on any public road or publically owned bicycle and pedestrian pathway or trail.

Interstate Maintenance Program (IM) - Provides funding to rehabilitate, restore and resurface the Interstate System. Reconstruction is also eligible if it does not add capacity. With the exception of High Occupancy Vehicle (HOV) lanes.

High Priority Project (HPP) – See *Congressional Earmarks*.

National Highway Performance Program (NHPP) - Provides for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.

National Highway System (NH/NHS) - The National Highway System (NHS) consists of roads designated by the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 to be important to interstate travel and national defense. The NHS also includes roads that connect other modes of transportation (airports, water ports and railroads) and provide essential paths for international commerce.

National Summer Transportation Institute (NSTI) – Funding for the NSTI Program is used to introduce secondary school students to all modes of transportation-related careers, provide academic enhancement activities and encourage students to pursue transportation-related courses of study at the college/university level.

Rail-Highway Crossings Program (Rails) - The FAST Act continues the Railway-Highway Crossings program, which provides funds for safety improvements to reduce the number of fatalities, injuries, and crashes at public railway-highway grade crossings.

Safe Routes to School Program (SRSP) - Funds are made available for infrastructure and non-infrastructure projects, and to administer Safe Routes to School programs that benefit elementary and middle school children in grades K-8.

Surface Transportation Block Grant (STBG) - The FAST Act converts the long-standing Surface Transportation Program (STP) into the Surface Transportation Block Grant Program (STBG) to flexibility to States and local entities to best address transportation needs. Surface Transportation funds may be used for projects on the Federal-aid System, which include the NHS and all other roads that are eligible to receive Federal-aid funding. STP/STBG funds are used on several large highway programs that the State of Mississippi has adopted. They include the *1987 Four-Lane Highway Program, the Gaming Roads Program, and the Vision 21 Program*.

Surface Transportation Program (STP) - STP funds may be used for projects on the Federal-aid System, which include the National Highway System and all other roads that are eligible to receive Federal-aid funding. STP funds have been used on several large highway programs that the State of Mississippi has adopted. They include the *1987 Four-*

Lane Highway Program, the *Gaming Roads Program*, and the *Vision 21 Program*. STP funds can be used on a variety of projects including roadway and bridge preservation, modernization, and expansion on the Federal-aid System. This program was eliminated by the FAST Act and replaced by the Surface Transportation Block Grant Program.

Transportation Investment Generating Economic Recovery (TIGER) - The eligibility requirements of TIGER allow project sponsors at the State and local levels to obtain funding for multi-modal, multi-jurisdictional projects that are more difficult to support through traditional DOT programs. Eligible projects for TIGER Discretionary Grants are capital projects that include, but are not limited to: road or bridge projects eligible under title 23, United States Code, public transportation projects eligible under chapter 53 of title 49, United States Code, passenger and freight rail transportation projects, port infrastructure investments (including inland port infrastructure and land ports of entry) and intermodal projects. Eligible applicants include: State, local, and tribal governments, transit agencies, port authorities, MPOs, and other political subdivisions of State or local governments. TIGER Discretionary Grants may be used for up to 80 percent of the costs of projects located in an urban area and 100 percent of the costs of a project located in a rural area.

Transportation Alternatives Program (TAP/TA) - The FAST Act eliminated the MAP-21 Transportation Alternatives Program (TAP) and replaces it with a set-aside of STBG funding for Transportation Alternatives (TA). The set-aside TA funds include all projects and activities that were previously eligible under TAP, encompassing a variety of pedestrian and bicycle connectivity type projects.

Jackson Urbanized Area FY 2017 Obligated Projects

FMS Number	External Number	Description	Date signed by FHWA	Federal funds Change	Fund Type	Action	For Whom	County

*Federal Funds Change – Items in red indicate a reduction in funds for the respective project. These reductions can be for a number of reasons including, but not limited to: the cost of the project was less than the amount of funds committed to the project, a change in funding type or a project sponsor requests to withdraw the project.
